

## Aviation Security Management

Duración: 05 días

### About

In the changing landscape of criminal attacks on civil aviation and security regulations, the role of the Security Manager is vital in assuring efficient and compliant operations.

Learn essential management and administration techniques to run your business while complying with national and international legislation. Through daily classroom simulations, test your ability to work under pressure in crisis situations and respond to common problems you may face in your daily operations.

This course is available at [IATA Training Centers](#), [Regional Training Partner locations](#), and on-demand as [in-house training](#).

### Course format

- This classroom course provides 5 days (40 hours) of instruction delivered by an official IATA Instructor.
- Student performance will be based on an [assessment](#)
- This course is scheduled back-to-back with the [Aviation Security Management - Advanced](#) course at IATA Training Centers worldwide. Register for both courses at the same time and we will credit them toward the [Aviation Security Management Diploma](#).

### Prerequisites

- Participants should have a minimum of two years of experience in aviation or Civil Aviation Authority administration
- Recommended level is Management and Professional
- The recommended level of language proficiency is [ICAO Operational Level 4](#) for courses in English or equivalent for other languages.

### What you will learn

Upon completing this course you will be able to:

- Align your organization's procedures with civil aviation security legislation
- Improve how you utilize your personnel, equipment and budget
- Apply industry best practices for recruitment, training and people management
